

ST. MARY'S HOME		ICF/IID POLICIES Active Treatment	
Regulation Cross Reference: 42 CFR Ch. IV §483.440. Tag # 255 - 260 Licensing: 12 VAC35-105-650 & 660 Human Rights		Policy # 4.9	Page 1 of 3
Subject: ADMISSION EQUIPMENT ASSESSMENT		Approved: 	
Issued: November 2016		Approved: 	

PURPOSE: To ensure that all equipment is noted and assessment begun; that consent for use has been obtained from the individual/AR /legal guardian and ordered by the physician on the day of admission, and any time thereafter.

Definitions:

SCC-	Specially Constituted Committee
OT-	Occupational Therapy
PT-	Physical Therapy
QIDP-	Qualified Intellectual Disability Professional
ISP-	Individual Support Plan
PCP-	Personal Care Physician
IDT-	Interdisciplinary Team
PM & R	Physical Medicine and Rehab
EHR -	Electronic Health Record
HRPP -	Health Related Protection Plan

PROCEDURE:

1. The pre-admission team will discuss with the parents or other caretakers all equipment being used. They will use prompts to discover if any are restrictive, so that emergency approval may be obtained from SCC prior to admission.
2. If possible, social work will invite the parents to come for another meeting to sign paperwork before the admission date. When this happens, OT and PT representatives will be able to begin the assessment paperwork before the actual admission date.
3. Social work will inform OT and PT of the admission date. OT will be available to complete the Admission Adaptive Equipment list. If this is not possible, OT will request PT to complete the form. Social work will request parents to sign the form and then forward to the Clinic nurse for physician's signature and approval and to the appropriate QIDP if an HRPP is needed.

4. If there is a perceived need to use an unexpected restrictive piece of equipment on the day of admission, the OT or PT will alert the team members so that assessment can begin and emergency permission can be obtained. Such equipment may not be provided by OT or PT with an individual staff request.
5. PT will complete the initial Functional Fall Risk, Bed, Safety and Equipment Assessment and forward it to the QIDP. (Language used for the Admission Adaptive Equipment List and the Bed, Safety and Equipment Assessment forms will be the same and should be on a level that can be understood by non-professionals)
6. The clinic nurse will enter an order for the PCP signature that states agreement with the use of all equipment on the Admission Adaptive Equipment list.
7. QIDP's or designees will add relevant equipment information from the assessment in to the electronic health record by the 30th day, following all assessments.
8. For the 30 day and annual meetings, the Functional Bed, Safety and Equipment Assessment will be updated and entered as a draft into the electronic health record 2 weeks prior to the annual IDT meeting, or as soon as possible following a requested change.
9. The OT will document any changes in equipment in the EHR so that other team members can review..
10. A confirmation email will be sent to the QIDP and the PM&R clinic nurse, who will enter the following order for the physical rehabilitation physician to approve: "Individual to use the bed and equipment as described in the current Functional Bed, Safety and Equipment Assessment".
11. It will continue on the order sheet that the PCP approves every 90 days.
12. Any changes to the assessment will be handled in the same way as any other changes to the ISP.

Revision Date	What was changed/added/deleted	Reviewer Name
4/2017	New policy format	J. Skirven
8/2018	Title change, added to #5 & 9 after PT review.	J. Skirven
2/2021	Removed #7 – no longer placed in unit binders	J. Skirven
7/2021	Removed behavior from #3 and altered #9	J. Skirven
